

Policy: New Water Hookups

Background

New construction requires safely and reliably hooking into the community water system. Such hook-ups have the potential to cause problems if not done correctly; consequently, the TMWUA Board requires use of approved vendors for all new hookups.

Purpose

Ensure that lot owners obtain their water hook-up from qualified vendors and pay for those services directly so TMWUA does not experience associated negative events or incur costs associated with this process.

Statement

To protect the integrity of our community water system and avoid expenses that are the responsibility of individual homeowner, the Board expects all community property owners to understand the requirements for contracting and paying for the necessary hook-up.

Policy

Element	Rationale
1. A property owner who intends to connect to the TMWUA water system must use a vendor approved by the Board. The Board will provide the names and contact information of currently approved vendors.	The Board has a responsibility to the community to ensure that new water hook-ups do not impact the integrity of our system and has the necessary experience to determine which vendors are acceptable to perform this work.
2. The property owner will contact the approved vendor. They will contract with that vendor directly and are responsible for all costs associated with establishing their hook-up to the TMWUA water system (including, but not limited to, re-paving as necessary).	Establishes the individual property owner's responsibilities when hooking up to the community water system.

Approved by the TMWUA Board: August 2025
Next Review Date: August 2028
